## UNION CHURCH

Sunday School, 2:30 p.m.  
7:30 p.m., evening service.  
The subject for this week's service is "The Lamb in Revelation" or "Do We Believe the Teachings of Jesus?"

The Men's Own will hold their meeting in the Primary Public School room at 2:30 p.m. Mr. R. M. Henderson will give a talk on "Insurance."

All are cordially invited to attend.

A. J. Keller, who has been employed at N. D. Storey's, left this week for Burttal to take up duties on his homestead.

## ANGLICAN CHURCH

Services in St. Mary's Church on February 10 (Sextagesimo), 11 a.m., Holy Communion, 7:30 p.m., Evening Prayer, 2:30 p.m., Sunday School.

L. J. Tatham,  
President-in-charge.

We are informed that Miss Florence L. Gontner, a former resident of Empress, has just returned to her home at Lancaster, Penn., U.S.A., from an extended visit at the home of her sister, Mrs. E. Clark Barr. Mr. Barr and family are located in a citrus and vegetable tract in the lower Rio Grande Valley, at Rio Hondo, Texas.

## One Dollar a Week

By regularly deducting one dollar a week from your Bank account, you can accumulate a substantial balance without missing the money deposited. In five years, with interest at 3%, compounded semi-annually, you will have \$280.26. In ten years your balance will be \$605.54.

## UNION BANK OF CANADA

Empress Branch, W. M. Crosbie, Manager

## Courteous Service

THE courteous attention extended by members of the bank's staff where you keep your accounts is entirely to your satisfaction in conducting your banking business.

Standard Service is essentially courteous service as rendered by every branch of this Bank, from the Manager to the latest recruit on the staff.

## THE STANDARD BANK OF CANADA

TOTAL ASSETS OVER EIGHTY-THREE MILLIONS

Bindloss Branch, Cavendish Sub-Agency, W. J. Harryett, Manager

EMPRESS, ALTA. THURSDAY, Feb. 16th, 1922

Price: \$2.00 Per Year

## ATLEE

O. J. Steward, is in Calgary this week, on business.

The U.F.A. and U.F.W.A. met in the hall this p.m., when they discussed the needs of the community for seed, feed oats and hay. At the close of the business there was a general discussion as to why they stay here. Many and various are the reasons given. They may be summed up as follows, "to better one's condition and make a home."

February 10  
R. J. Duncan has received word that his daughter, Mrs. Ralmore, died suddenly, at Delta, yesterday. Mr. Duncan will leave for Delta, Alta., on Monday.

February 11  
The Hard Times Dance in the U.F.A. Hall, last night, was very near to being a failure, only a few belated couples attending. A hard time dance at \$1 per ticket does not seem very popular in Athabasca.

Miss Julia Williamson is expected home from Lethbridge this evening and school will resume again Monday.

The Ornith Homo Saurus Entertainment at Buffalo, on Wednesday was not very well attended, this was undoubtedly on account of bitter cold weather and the blizzard that was raging at the time.

There is to be a debate in the U.F.A. hall, on Friday evening, February 19th, at midnight. A whilst debate is to take place the same evening. In conjunction with the debate other attractions will be presented.

"Shorty" Fenson returned on Saturday from Bindloss, returning there on Monday morning's train. He reports that good headway is being made with the construction of the provincial passenger bridge there.

## The Truth-The Whole Truth

A Hebrew small strokkeeper, to the surprise of his brethren, suddenly decorated his window with a gorgeous new blind.

"See blind of yours, Isaac," said his neighbor.

"Yes, Aaron."

"Who paid for it, Isaac?"

"The customers paid, Aaron."

"What, the customers paid for it, Isaac?"

"Yes, Aaron. I put a needle box on my counter and marked it, 'For the blind.' And they paid for it."

## NOTICE

Arrangements have been made by which Ratepayers who wish to do so may avoid payment of penalty added to arrears January 1. All taxes in my hands before May 1, 1922 will be accepted at par, and the penalty cancelled.

C. Evans Surgeon,  
Secy.-Treas.

## Communication

### Oats to Be Shipped in Free of Freight Charges

Dear Sirs—

Will you allow me to use a little of your valuable space to inform the ratepayers of the R.M. of Montario 262 that I have just received word from Mr. Harvey, M.L.A., that arrangements have been made with the Hon. W. Motherwell by means of which Oats will be able to be shipped in free freight to the dried out areas of this Province. While I have not yet the details of how this is to be done, Mr. Harvey says in his letter that Mr. Auld, the Deputy Minister of Agriculture at Regina, says that I may assure you that this will be done this spring.

It might be a good idea for the local G.G.A. officials to write the Dept. of Agriculture, Regina, thanking them for the promise and telling them that oats are having to be shipped in now to keep things alive till spring, and enquire how this free rate is to be obtained. We have been working to try and get this concession for the last six months, and having got this near we want the matroncelled out and in operation as soon as possible.

The Dept. of Municipal Affairs has also made a concession which may help some. The Municipality may for this year

## CAVENDISH

Mr. Murphy, Govt. Relief Agent, missed the train on Friday night, and had to make a stay-over here.

Mrs. Clark Frazer will address a meeting on Friday night, February 17. There is to be a concert and dance after the meeting. Mrs. Frazer will also address the U.F.W.A. meeting on Saturday, Feb. 18, at 3 o'clock. The local would like to see some new members in the organization; don't forget to get to the meeting.

Mr. Frank Stotts received a telegram on Saturday morning containing the very sad news that his wife had passed away.

Mr. and Mrs. Stotts have resided one mile south of Cavendish for the past six years. Mrs. Stotts went away just before Christmas to visit with friends and relatives in Nebraska, U.S.A. She was expected to return to this district the beginning of March. Mr. Stotts on Saturday night, for the States where he will attend the funeral of his beloved wife. The sympathy of the district is extended to Mr. Stotts on his bereavement.

The Bullen Brothers are putting on their entertainment in the U.F.A. hall on Thursday,

only pass a resolution by means of which penalties on arrears may be remitted paid before May 1st of this year.

Some interest for three months on the use of the money is at the rate of 32 p.c. per annum and worth saving. If there are any ratepayers left who can pay their taxes and would like to save that \$8 or \$10 that they just could not arrange for by December 31st, they would be wise to see their councillor and make sure that the resolution goes through.

Rural Municipality of Montario No. 262

C. Evans Surgeon,  
Secy.-Treas.

## VANDYNE WEDDING

The marriage of Miss Th. C. Ladon of Bindloss, to Mr. A. Muskeyn, of Vandyne, was arranged to take place on Friday, February 10. The ceremony to be held at the residence of Mr. and Mrs. P. Spaalen, of Bindloss. Miss Ladon, came from Holland, in August, 1910. She spent a few years in Montana, U.S.A., previous to her taking up her residence in Canada. Mr. A. Muskeyn left Holland in June, 1910, for Canada. They will spend their honeymoon at Calgary and Banff. They have the best wishes of the community.

February 23. A sleigh load of people went to the entertainment at Buffalo, in the extreme cold and the blizzard, on February 9. They are just now beginning to get thawed out. Those that went said they sure had a good time.

February 24. A meeting of the members in the U.F.A. hall on Saturday, February 11. Fifteen members being present. The meeting was of much interest. The members had written essays on birds and their habits. The most essay was that of Miss Mabel Morrison's. After the meeting they sang a general song to a general end at a concert at the beginning of March.

## Canada's Needs

No. 5—Cheaper Transportation

In preceding articles in this series Canada's need of a larger population, of a return of agricultural prosperity, of world markets for its products, and of a greater employment of Canadian рапортери in business and agriculture, have been discussed and emphasized. As one means of hastening about the realization of all these improvements in our national life, possibly too great stress cannot be laid upon the question which forms the subject matter of this article, namely, cheaper transportation.

During the war years, and for a time following the Armistice, there was a steady and marked increase in rail rates, and in the railroads of the country both in the carriage of passengers and freight. Rates went up by leaps and bounds until they far surpassed anything known previous to 1914. No doubt advances were inevitable and necessary under the unprecedented conditions created by the war and the financial and commercial upsurge following those years of destruction. But the comparative rates have been gradually reduced, and the railroads are now as a result of this healthily all over after using this health benefit.

The burden of excessively high transportation costs must now be removed as a first and necessary step to a resumption of that activity throughout the whole business world which is essential to a return of prosperity and plenty for all the people.

While war-time high prices for labor and all commodities prevailed, business could carry the burden of high transportation charges. Two dollars a bushel wheat could bear a heavy freight rate and yet leave a profit to the farmer, but wheat which realizes a dollar a bushel or less cannot pay the same price. The railroads have been compelled to reduce rates, and the government. And what is true of wheat is equally true in the case of livestock and of all articles of commerce. Yet while the prices of all articles produced by the farmer have enormously decreased, there has been practically no decrease in the charges he has to pay to get his products to market, nor to the necessities of his business.

The result is that the prevailing high transportation charges are threatening business and ruining the producers of the country. Inevitably and ultimately the railroads themselves must suffer. If production continues unpredictable it will cease, or at all events be largely decreased. Decreased production means less traffic, and a lowered buying power of the people, which with more smaller consumers of the products of the factories, and a general reduction in business and traffic all round. If the people are not prosperous, the railroads cannot be.

The recently adopted unanimous resolution by the Saskatchewan Agricultural League demanding a reduction in freight rates, as well as by the Manitoba and the demand voiced by the United Farmers of Manitoba and Alberta, which will be re-echoed by Saskatchewan Grain Growers; the protests by leading newspapers in Toronto, Montreal and other large centres, and the emphatic declaration by Hon. R. E. Fisher, member for North Saskatchewan, that the railroads must be reformed before the Dominion Railway Commission, that, if the Maritime Provinces are to live industrially, and Confederation itself not weaken, they must have lower freight rates, all go to prove that cheaper transportation is the crying need of the Dominion at the present time, and it cannot be provided without delay if widespread unemployment is to be avoided.

In urging the immediate reduction of freight rates, there is nothing antagonistic to the railways. Quite the reverse. Everybody appreciates the fact that the railways cannot continue if operated at a loss. It is to the interest of everybody that they should prove profitable and be maintained fully efficient, and those who have invested their money and given their energies in such enterprises as these will be private individuals or the nation itself are entitled to a just return.

But if present conditions are not quickly remedied the railways will soon be numbered among the greatest losers of all. The railways will be far better off with an increased and increased volume of traffic, and rates should be reduced and rates increased at statutory rates. Should rates continue to decline the railways must lose unless rates are still further increased to cover such loss of traffic. Rates are almost prohibitive as is, and admittedly are restrictive of business. There is a point where high rates operate to decrease rather than increase profits, and that point has already been reached. It is bad to have no profits.

It is in time for a reduction in transportation charges, and the people are willing in a demand that such reductions, and substantial ones at that, be ordered.

## Ambitious Highway Plans

Manitoba Is Ambitious in a Big Road Campaign

Plans to take Manitoba out of the bad roads category are under consideration by the Manitoba Motor League and the construction of 1,050 miles of main and secondary highways the province will be asked for at the next session of the legislature. The Motor League proposes a scheme of road building which would affect the work of highway work throughout the province and would provide that no person would be more than 15 miles

distant from a trunk highway.

Under the present system of trunk roads, a man could travel 20 miles of gravel, according to the standard of the Good Roads Board and the cost of construction would be provided for out of motor license fees.

## China's Large Coal Lands

Estimates Show Country Has Bulk of Hard Coal

The coal deposits of China, more roughly surveyed, are estimated to be as large as all the coal lands of North America. Coal occurs in most of the provinces of China proper and in nearly every part of the country. Coal is also found in the provinces of Kansu, Shensi, and Shantung, which are 300 miles from Tientsin, the port of Peking, with which it has railway connection. The coal fields of this province number about 100,000 square miles. According to British authorities, several of the coal seams are twenty feet or more in thickness. Most of the coal is of excellent quality, and it is estimated that the deposits constitute about four-fifths of the world's supply of hard coal.

In the Arctic regions there are 762 different species of flowers, but with the in the Antarctic Circle there has never been found a flowering plant.

Ingenuity is what a man would need in trying to tan the hide of a dog with his hair.

Red Rose Tea is good tea.

Minard's Liniment for Warts, Corns, Etc.

## Quick Growing Trees

Western Farmer Can Grow Wood for Fuel Within Six Years

Many of the trees on the prairies which can be used on the prairies are very rapid growers, for example, cottonwood, willow, Russian poplar, and Manitoba maple. It is safe to say that the wood of these trees will be good to use from any of these trees within six years. After that time a plantation will increase in value and productivity year by year and will provide a valuable addition to the farm.—Norman M. Ross, Indian Head Forest Nursery Station, is authority for the above.

DO YOU FEEL LIKE THIS  
WHEN YOU WAKEN?

You feel blue, sickly, heavy, too tired to get out of bed, your liver is low and needs to be tonified and strengthened. Dr. Hamilton's Pill will make in a few days. The doctor says Dr. Hamilton's Pill will make in a few days. The doctor says

they aid the stomach, improve digestion, increase sleep, and give you more energy all over after using this health giving medicine. Thousands have proved of the value of Dr. Hamilton's Pill. The doctor says Dr. Hamilton's Pill is the best.

**A Singing Rant**

A Japanese firm will make an attempt to raft timber from British Columbia to Japan. The raft will be of the Davis type, with a superstructure of oil and gas tanks, to be towed by tugs.

It is to be a raft to the journey from San Francisco to China, followed by exceptional weather.

## GUARD YOUR HEALTH

You Can Do This by Keeping the Bed Rich and Rest

It is useless to tell a hard working woman to take it easy and not to work. Every woman in the shop, offices, and factories subjected to more or less physical exertion, needs a rest. Pink Pill will be of great service to all mothers.

It is the duty of every woman and every girl to save her strength, to keep it up, and to build up her system to meet unusual demands.

Her future health depends upon the strength of her blood. The blood must be kept rich, red and pure.

Dr. Williams' Pink Pill will be found most useful.

They strengthen the heart to help to pull cheeks, and renewed energy to listless people.

They help to keep the body strong, and to build up their system to meet unusual demands.

Her future health depends upon the strength of her blood.

The blood must be kept rich, red and pure.

## Fruit And Vegetables Prepared By A New Method Of Evaporation

The New York Independent recently published an account of what is called "Pocket Gardens" taken from the Arctic area. "When the MacMillan expedition packed up its goods and chattels a short time ago and departed for Baffin Land and the Frozen North, it carried along the first fresh fruits and vegetables ever to penetrate to that barren country," says The Independent. "Packets of fresh fruit and vegetables were packed in the stalks of radish plants, raw and unripe, so that when saturated with water for sale were included. Can you imagine the scene? A midsummer dinner in the midst of icelocked fields and a green, vine-wrapped Earth, the Arctic wonder and the home of the strange. Fresh food, months after it had been pulled from the garden and eaten still fresh in a land where no vegetation grows, was found! How it was accomplished! Every bit of it has been wrapped up simply in paper bags and stored away in winter quarters than the blizzard of winter. Yet such frozen food has been carried along in this form to last each member of the party five months."

According to The Independent, this "Pocket Garden" was made possible by a new process of dehydration which gets rid of the water in fruits and vegetables without destroying the original flavor, so that, by placing them in water for a few hours, they are ready to eat in a condition of freshness. This process is designed to dehydration on a large scale in factories, but for use on farms and in homes, so that the housewife, whether on the farm or in the town, can quickly prepare delicious fruits and vegetables for winter use.

Dehydrated fruit or evaporated fruit as it used to be called, has not proved very favorably by the public in this country. The processes were imperfect and the results produced unsatisfactory. Recent discoveries by experts and the latest results of the experiments have now removed all objections, and demonstrations have been made to prove that the fruits and vegetables are as good as when fresh.

Dehydrated fruit or evaporated fruit as it used to be called, has not proved very favorably by the public in this country. The processes were imperfect and the results produced unsatisfactory. Recent discoveries by experts and the latest results of the experiments have now removed all objections, and demonstrations have been made to prove that the fruits and vegetables are as good as when fresh, and from the dehydrated and restored results.

If a domestic dehydrator capable of dispensing the water from fruits and vegetables without destroying the flavor or could be manufactured in Canada and sold at a price to bring it within the reach of the housewife, it would considerably reduce the cost of living both by eliminating waste and by reducing the cost of preserving fruits' vegetables in the house. In this country it would save the use of glass jars and other necessities of old-fashioned canning. Dehydrated fruits can be safely kept in cardboard boxes such as are used for cereal foods or even in ordinary paper bags. Each household may have glass jars and wishes to use them for the purpose of storing dehydrated food can put a much greater quantity of food in them than was possible when preparing food by old-fashioned canning methods.

According to a table prepared by Prof. Caldwell, Horticultural Investigator, Washington D. C., harvested fruit, Washington D. C., had contained lots of fresh fruits and vegetables reduce as follows upon dehydration, the differences in weights being due to the varying quantities of water in different kinds of fruits and vegetables products:

Apples to .....	12 to 15
Apricots to .....	16 to 20
blackberries to .....	16 to 20
beans to .....	11 to 13
beets to .....	8 to 9
cabbage to .....	9 to 10
carrots to .....	10 to 12
cauliflower to .....	12 to 14
celery to .....	8 to 9
cherries to .....	22 to 26
cherries (dried) to .....	26 to 30
cherries (sugared) to .....	10 to 22
onions to .....	9 to 11
parsnips to .....	20 to 22
peaches to .....	13 to 16
pears to .....	22 to 25
pears (canned) to .....	23 to 25
potatoes (white) to .....	6 to 8
pumpkins to .....	17 to 23
raspberries to .....	8 to 10
squash to .....	6 to 8
strawberries to .....	12 to 15
tomatoes to .....	8 to 10
turnips to .....	7 to 8

"There will never in the past been a system of home drying, that would compare favorable to this one," says the author. "It is not only that it is the most economical way of drying."

In glass jars, it is claimed that this difficulty has now been solved, and that food can be dried in the home more conveniently, and economically than it can be canned."

Women prefer their fruits preserved to factory canned products, not

### Hide Market Firmers

Slow Improvement Noted, Says Dr. Robert

Rural communities are beginning to feel the hide and leather market on the prairies. Last year, 50,000 hides were reported to be rot between Windham and Calgary, and because there was no market or what there was would realize but 4 cents. The prairies produce three-quarters of the world's hides, but the greater portion goes to the Today Montreal and Toronto are paying \$1.50 and 95¢ for the two grades of \$1.00 at buyer's price. Chicago buys the larger portion, but the difference in exchange is fair to the Eastern Canada market to make the price identical. The small town butcher on the prairie is netting 6 cents on his hide today on the prairies and the leather is not appreciated. The peak of the market during the war was cents. Ltd. Toronto and Montreal. Harness leather was then \$1 a pound on the Winnipeg market, and it now stands at 65 cents but takes two pounds of leather to make one of leather. One western firm has been selling harness leather at 50 cents; it shipped a one of its hides to an Ontario tanner who charged 22 cents for tanning. Out of 12 tanners in the market, only one is tanning this process for the western firm but two replied, though most of the others were idle.

The prairie produced 6,000,000 pounds last year, but the production will be smaller this season because of so many animals having been killed.

### Wireless for Police

Chicago Officers Will Carry Small Phone Apparatus

Soon every policeman in Chicago will carry in his pocket a miniature telephone. No matter where he may go in the country he will be in touch with his headquarters, a policeman will communicate with him instantly. A policeman will be able to receive a message but can't send one. He can hold the instrument in his hand. It has a receiver and he can plug it into any telephone and when properly tuned to a telephone he can hear his message as distinctly as from a call box. The receiving antenna will be 10 inches long and the telephone case, while walking along the street the policeman will suddenly become aware of a little buzzing sound—the signal. He will place the receiver to his ear and get the message.

### Rheims to be Rebuilt

Work Will Not Require More Than Seven Years

The city of Rheims may be rebuilt within five years. This is the opinion of Marquis Melchior de Polignac, president of the Co-operative Society for the Reconstruction of Rheims. At the present time he is in the United States. The reconstruction of the city will require more than five or seven years.

The amount of work remaining to be done is estimated by the Marquis to cost 1,000,000,000 francs, of which 100,000,000 francs will be required for reconstruction. He

says that the society will have 200,000,000 francs placed at its disposal

each year for the next five years. This is by arrangement of credit with the Department of Public Works.

It pays to patronize home industry. Buy from the merchant in your town.

### Many Will Investigate Northern Oil District

Extent of Field Will be Determined

During 1922

With more oil prospects than ever before projected to open the northern country, the true nature and extent of the Fort Norman oil field will be fairly accurately determined during 1922, according to Willis J. West, executive manager of a transportation company operating in the oil fields of the Arctic Circle.

Steady development is what is most desired and there will be a steady stream of people into the new empire to determine the extent of the oil field in the nature of a rush is looking for nor the people of the country want any terrific influx at this time, Mr. West stated.

The country is so vast as to be almost impossible to get a good idea of who has never been there to visualize it. One of the ships operated by his company makes a journey 1,000 miles every time it goes to the West, while another ship is held in the Arctic and charged it was not nearly so cold as some of New York State nor as cold as the Carbonate country. Vegetables can be grown in all parts of the Arctic Circle, he said.

Some of them have attempted to follow their income by working, but with more or less indifferent success.

Literature in the form of "Memoranda" from various members of the family has been presented to editors, but none of them has shown great enthusiasm to publish the books.

## Agricultural Education Is Carried To A Point Of Excellence In Canada

### Proud Hapsburgs In Poor Circumstances

Have Tried in Various Ways to Improve

Scattered throughout Europe, the members of the once proud house of Hapsburg are all living in relatively poor circumstances, some of them in poverty.

Ex-Emperor Charles and ex-Empress Zita, who were sent to Finchaburgh, N. S., as "guests" of the allies, are supplementing their allowance by the sale of some of the family jewels.

Archduke Eugene and Ferdinand have been granted a pension by the Swiss Government to remain at Lucerne, where he was found after an enquiry that they had nothing to do with Charles and Zita, who were sent to Finchaburgh, N. S., as "guests" of the allies, are supplementing their allowance by the sale of some of the family jewels.

Archduke Eugene and Ferdinand have been granted a pension by the Swiss Government to remain at Lucerne, where he was found after an enquiry that they had nothing to do with Charles and Zita, who were sent to Finchaburgh, N. S., as "guests" of the allies, are supplementing their allowance by the sale of some of the family jewels.

### Wrong Side Up

Under the above title in a pamphlet recently issued by the North Dakota Agricultural College appears the picture of an old Indian turning back the freshly plowed prairie sod and saying to the new settler, "wrong side up." It represents a movie in real life and was an actual occurrence with an old Sioux Indian (name unknown) and John Christiansen, the patriarch farmer of New Salem, N.D., as the actors. The scene is John Christiansen's homestead, time spring of 1883. Thirty-eight years later, time, July 20, 1921. John Christiansen is shown surrounded by a thousand friends and neighbors, who have come to see

### The Beauty About Our Coal

is that it is the kind that makes satisfied and contented customers.

Coal that yields lots of heat—contains itself—and makes little waste—ought to be its own best argument.

Our order will prove this argument to you for OUR COAL.

what he and his associates had accomplished. Standing on the old homestead, amidst his modern farm buildings with sleek cows lowing contentedly on the prairie pasture, a few rods away, he repeated the story of the old Sioux Indian, and said: "Folks, the old Indian was partly right; we turned too much of it 'wrong side up!'" Then waving his hand toward the modern house, barn, electricity generating wind mill, milking machine, etc., said: "All that you see here, the cows have paid for, and they have furnished myself and family a good living besides."

The Indian's slogan made a dairy district of the New Salem region by ringing in the ears of John Christiansen until he converted his neighbors to the gospel of dairy farming. The cows brought the necessity for a community creamery, which was built jointly by the farmers and the town-peopple for the common good.

Retaining the prairie grass pastures has made co-operative dairymen of the New Salem settlers.

Seventeen men constitute the New Salem Circuit, organised to breed dairy cows as a community enterprise. They to

years ago. In one year more

they will be out for another such trade. The better herd bulls on the circuit have been passed from farm to farm until they are ten to thirteen years old. Four circuit member

neighbors use a section of pasture land together, without cross fences. They have used it in common for ten years.

The year 1920 was a short crop year, but the 17 circuit members averaged more than \$25,000 of gross income per man from milk products and surplus stock. Of the 17 members—many of them young men—there is but one with a money recorded against him.—Ex.

### YOU CAN GET 150 MORE FOR A BUSHEL OF WHEAT

That Is What  
You Can Do  
Provided You  
Take Advantage  
of Our Offer

We have made arrangements with the E. H. Heath Co. to furnish to our readers THE CANADIAN POWER FARMER. We are able to offer that farm magazine together with our own weekly at the one price for both papers.

**FARMER** is Western Canada's biggest farm monthly. It is now in its twelfth year which means that it is thoroughly established throughout the West. It contains all the latest news from the farms, as well as a full list of helpful hints and experiences on the operation of all kinds of farm machinery and from a washing-machine to a tractor. It editor has just come from the United States and has been to the Canadian in a motor car for the purpose of studying the mechanical needs of the farmer. He visited the farmers, lived with them and worked with them. The results of his trip will appear during the next twelve months.

The **WHEAT** will be withdrawn at any time. Without doubt your intention is to renew for the yearly, then you will get advantage now. Your subscription to this weekly together with your subscription to **THE CANADIAN POWER FARMER** for the same price is this really alone. This is where you make \$1.50 on a bushel of wheat.

Mail your cheque or drop into our office the first time you are in town.

### NOTICE To Motorists

## Canada's Winter Boom

Writer in Henry Ford's Paper Comments on This Year's Blizzards of Carnivals

"Canada Now Capitalizing Her Climate" is the title of an article in the January issue of the Dearborn News-Press, Henry Ford's paper, in which some attention is given, among other things, to the winter carnivals which will this year be held at Montreal, Winnipeg, Calgary and other points.

As far as winter in the independent press, it is the time past when Canada is afraid of being considered "The Lady of the Snows." Some passages from the article are as follows:

"Winter is the time of the big carnivals which will extend from the Chateau Laurier across the Ottawa River to Hull, on the Quebec side which it is claimed, will be the longest side of its kind in the world. That is to say, the winter carnival will be extended to a certain Chinese." Wish Walker, back miler"—shall not be come too painfully realistic. It is proposed to bring toboggans and tobogganists back to the starting point by electric roller, toboggans will be provided for skating, skiing, snowshoeing, curling and many other winter sports and pastimes.

Rudyard Kipling is quoted as follows:

"The winter in Canada—such as it is—will be placed on the good old Canadian winter—for a generation it has been in disgrace. It was Canada's family skeleton and has been most carefully kept from view. Killing the winter has been a race with the storm, how it has run, will be celebrated in the inauguration in Canada of the British Preferential Tariff of 1917 by his poem entitled, "Our Lady of the Snows." This refers at the end of the poem to which is indicated by the title phrase. The British poet was not writing of Canada's climate. The subject was entirely political; the allusion entirely poetical. Kipling merely wished to place a poem which would be expressive and fair typical. There is no doubt that snow is common to nearly every part of Canada—in winter time, of course, and is about as typical as any other climate in the world. At the time that Kipling wrote the great prairies of the Northwest were being prairied up, the government and the railways were desirous of inducing immigrants to go on the prairies, and the winter climate could be defeated if the impression got abroad that Canada was a land of snow and ice. Kipling's poem was read far and wide. It is political significance was always understood, but Canadian fears that Canada had become indefinitely associated in the minds of people the world over as a region of snowdrifts. So the road went that winter came and everything which might tend to draw attention to the Canadian winter were to be jettisoned in distinctly bad form."

"In a certain sense Canada is climate. In a class by itself, Canada is the only country in the world which can two distinct seasons as the Canadian summer and the Canadian winter be found extending over such a generally large area. Most countries in the world have one winter. Canada's has little or no winter. On the other hand, not many others having a distinct winter season with an abundance of snow and low temperatures are willing to compare with that to be found in Canada. Canada's summers are really like those of Southern Europe, while its winters are more like those of the Scandinavian countries that is to say, talk about the weather. In Canada there are two distinct seasons result in an entire change of activities, not only as regards sports and pastimes, but also in many lines of commerce.

### Faith Is Mutual

Justice Lemire Tells New York Bar of Canada's Friendship

Speaking before the New York State Bar Association convention, Justice St. Francis X. Lemire, of Quebec, referring to the Ambassadorial Arbitration, said: "The question of reducing submarine which a nation may own, which proved such a burning one at the Washington conference, lessened the Canadian attitude quite sober and indifferent." The peaceful relations between the United States and Canada along their three thousand miles of unfortified boundary defensible by the Canadian militia must faith and good will, and our faith in treaties which, though God, are not looked upon as scraps of paper."

For fifty years seven lights have been numbered and right from the time of the Bishop of Erie, in one of the Catholic churches in Chicago, These lights commemorate the escape of the coffee from destruction in the great fire of 1871.

### Films on Farming in Saskatchewan

Illustrate Egg Markets, Selecting a Dairy Cow, Farm Boys Camping. Movie films on egg marketing, selecting a dairy cow and farm boys camping have recently been made by the visual instruction department of the Saskatchewan department of education and will be exhibited shortly throughout the province.

The subject of marketing eggs in Saskatchewan is covered in a comprehensive manner, both the right and the wrong methods being illustrated. Beginning with the farmer's herdsman, the spectator is shown the best methods of production in the first place; how the farmer should market with due regard to the fact that the return should depend on the quality and not the quantity of the product. The storage of eggs, and the eggs for export being inspected by Dominion Government officials. Lastly, are some views of the work of the provincial branch of the Better Farming Trust and of the educational plant at the College of Agriculture.

The film on the subject of selecting a dairy cow demonstrates all the various points involved in selecting a judge of dairy cattle would look for in the "three wedges" which outline the conformation of the animal should present when viewed from different angles; the point of the shoulder; the lean short head; wide neck; well sprung ribs and strong hindquarters; the tail and so on.

The last film illustrates the dangers at the farm boys' camp, which have become such a noteworthy feature of the larger summer exhibitions. The moral educational value of this picture is apparent to the parents.

### Amazing Commercial Growth of Malaya

Gifts to Britain Since 1912 Total Ten Millions

British Malaya now takes up as much of the City of London's attention as any other city in the world.

At the time that Kipling wrote the great prairies of the Northwest were being prairied up, the government and the railways were desirous of inducing immigrants to go on the prairies, and the winter climate could be defeated if the impression got abroad that Canada was a land of snow and ice. Kipling's poem was read far and wide. It is political significance was always understood, but Canadian fears that Canada had become indefinitely associated in the minds of people the world over as a region of snowdrifts. So the road went that winter came and everything which might tend to draw attention to the Canadian winter were to be jettisoned in distinctly bad form."

"In a certain sense Canada is climate. In a class by itself, Canada is the only country in the world which can two distinct seasons as the Canadian summer and the Canadian winter be found extending over such a generally large area. Most countries in the world have one winter. Canada's has little or no winter. On the other hand, not many others having a distinct winter season with an abundance of snow and low temperatures are willing to compare with that to be found in Canada. Canada's summers are really like those of Southern Europe, while its winters are more like those of the Scandinavian countries that is to say, talk about the weather. In Canada there are two distinct seasons result in an entire change of activities, not only as regards sports and pastimes, but also in many lines of commerce.

### Makes New Record

Pullet at Invermere, B.C., Lays 325 Eggs in Year

"Lady Dot," a White Wyandotte pullet, at Invermere, B.C., completed her yearly record on October 31st, producing 325 eggs during the preceding 365 days. She was hatched on May 29, 1920, and was introduced to lay in October. She was placed in a permanent laying house and trapnested from November 1st. The following is her monthly egg production for the year:

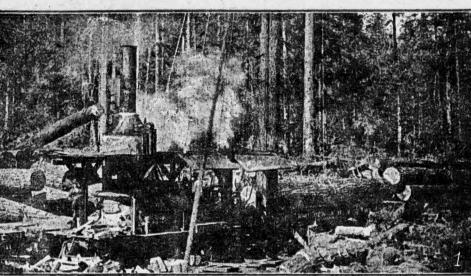

For the four winter months "Lady Dot" produced 105 eggs, which is more than many pullets do in a year. From Aug. 1st to Oct. 17th when she quit laying, she laid 78 eggs, 75 of which were laid during the 17th and continuing until October 17th, a period of 135 days, she produced 150 eggs. "Lady Dot" did not go broody during the year, but continued to moult and lay until the 17th of the 17th. Unfortunately there is no trap nest record for her eggs prior to November 1st, 1920, otherwise her yearly record would have been more. As an individual she is, I think, the most active bird in the flock.

"Lady Dot" is from the experimental farm flock that averaged 195 in the pullet year and is the result of 8 years breeding and selection.

Resume New York-Bremen Line. Resumption of the New York-Bremen passenger run with three German steamers of 9,000 tons each, is an indication of the great demand for transatlantic travel to America.

Seven and one-half years ago such advertisements disappeared from publications there.

## Lumbering in British Columbia

The greatest industry in British Columbia is lumber. Many thousands of men are employed in cutting it, in sawmills, in advertising prospectors who go out for parts unknown and unexplored to look for fresh and profitable timber-licences, down to the expert timberman who finishes off the beautifully veined panel of Douglas Fir at a factory.

It is estimated that there are 400 million feet of merchantable timber in the province, more than half the forest wealth of Canada, and experts say that over five times the amount at present can be cut. This may be without encroaching too much on the timber resources of the province.

The value of forest products for 1919 was \$70,385,594, but this was largely owing to the high prices prevailing for all lumber, wood-pulp, etc., due to the world shortage and a great demand.

Douglas Fir is the most famous of all British Columbia's trees, growing in a height of 100 feet and a diameter of 12 inches. It is used for houses, construction, boat-building, mine props, poles, railway ties, bridge and trestle timbers and many other things.

Then there is the Red Cedar, famed all over the world for the shingles it produces, and, from the need of dressed paneling for living-rooms; the Sitka Spruce for aeroplanes, and Western Hemlock for box-manufacturing and pulpwood.

There is a lack of timber in British Columbia, a lack of trees and the woods and inlets of the coast around the city and one seldom looks out to sea without watching some little tug tows a huge log of logs behind it that have come perhaps from hundreds of miles away up the coast.

Who shall say the lumberjack's life is not one of the best there is? Care free and next to nature, he spends his days in the great outdoors, and his nights in the log cabin.

A Peninsular catamaran from Penang, Negeri Sembilan and Palauh and administered with their goodwill, by British officials, and a number of states which have not entered the Federation.

The country, which is about the size of England, without Wales, consists of the Straits Settlement, a crown colony embracing Singapore, Penang and Malacca, and the Federated Malay States.

The Honors List

Of the whole list we may say that it is a matter of either not worse or not better things are to come. Apparently we are committed beyond call to the periodical shower of titles which descend in equal measure upon people who have distinguished themselves in their various callings, and others whose merit may be as great but has escaped the same degree of public knowledge. The system is a thorough bad one, and the first list of 1922 does little to redeem it from that curse.—The Westminster Gazette.

New Elevator for Fort William.

Another five hundred thousand dollars have been added to the enormous storage facilities of Fort William, according to reports. A private grain firm is building it.

(1) A Donkey Engine used to draw in and load logs on the cars. (2) Cutting down a Douglas Fir tree in B.C.

The alien forest before the timbermen have cut it down, and tell us that another giant fir has fallen beneath their hands.

His good day's work done, he has nothing else to think about but his evening meal ready waiting for him at the cook-house—and a pipe and sound sleep.

There are in British Columbia 600

helps and paper mills, 515 sawmills and 70 shingle mills, as it will be realized that the lumber world is in this

providence a vastly important one to all those who have their being in it, from the lumbering himself down to the expert sawyer who can command almost any wage he asks by reason of his rare ability.—H. G. W.

## Canada's Dairy Competitions

Aggressive Attitude of Other Countries in Capturing World's Markets

In addressing the recently at the conventions of Ontario dairymen, the Dairy and Cold Storage Commissioners, Mr. J. A. Riddick, drew attention to the increasing competition that Canada faces in the world in the dairy products. He pointed out the enormous strides that Argentina has made in recent years, the aggressive attitude that New Zealand had assumed in the South Africa.

Argentina, for instance, for instance, the export of butter previous to 1914 was never more than ten million pounds per year, but for the eleven years following November 1913, it was 41,457,700 pounds per year, or 1,600,000 lbs. more than the United Kingdom alone. From New Zealand, the exports, also principally to Great Britain, were, in 1914, 47,055,128 lb. butter, 91,532,896 lb. cheese, and in 1921, 73,911,915 lb. butter and 111,583,204 lb. cheese.

The cheese mentioned has risen from \$8,912,230 in 1914. South Africa, it is true, has hardly yet become a serious rival in the export of dairy products, but it is rapidly increasing, and may be expected to surpass us.

In 1913 that country imported nearly four million pounds of butter and more than five and a half million pounds of cheese, and exports in the present year the exports of butter exceeded the imports by 1,762,009 lb. and the exports of cheese the imports by 210,000 lb. These figures represent an increase in the imports of 1,653,000 lb. of butter, and 576,000 lb. of cheese for nine months in 1921 as compared with a whole year in 1919. Canada's figures show an increase in the value of dairy products from \$21,193,165 in 1914 to \$26,861 in 1921, or close upon 150 per cent.

There was a decrease in the quantity of cheese exported, but a large increase in butter and in condensed, evaporated and powdered milk. In the later United States had a years gone by practically a monopoly.

Some of the conclusions reached by Mr. Riddick are, first, that Canadian dairy products are not in demand, or service, so much in marketing problems as do the dairymen of other countries; second, that the dairy situation is critical owing to conditions arising out of and following the war; third, that the Canadian dairymen are in a position to exercise full control over its exports; fourth, that future competition in the world's markets will be keener than in the past; fifth, that when dairy products are controlled, when adequately controlled prices, they can do much in securing the fullest possible return to the producer; sixth, that producers should study world conditions, and endeavor to adapt their production to changing circumstances; and, seventh, that Canadian dairymen instead of taking the initiative themselves thus increasing their own power and self reliance, have depended to too great an extent upon government action.

### Magnificent France

Remarkable Recuperative Powers

Present Lesson to the World

France is one of the wonder nations of history. Conquered by Rome, its people assimilated Roman civilization. Overrun by the Franks, it assimilated them. Invaded by the Normans, it civilized them in life. Defeated by Germany in the Franco-Prussian war, it recuperated swiftly and overthrew its arrogant conquerors. For a period of time, it also had to learn to live in comparative obscurity, but in

absolute calm in time of peace, it has displayed marvellous unity of purpose in time of war. Light-hearted, loving, it also has displayed a calm, industrious and that is the secret of its success. Always undivided by thought and expression has been a deep current of seriousness which has found expression in its religious, its economic, its social and its practical life.—Seattle Times.

### Prarie Telephones

What does the name Saskatchewan suggest to you—miles of wheat, pine forests, and prairies? That is a good beginning, but the name also suggests

the prairie civilization. It has more telephones per capita than any country in the world, except Sweden, more automobiles than any other Canadian province. It contains 2,117 cities, towns, and other settlements, and 115,000 farms.—Bradford Daily Telegraph, Bradf., Eng.

### May Predict Weather Year Ahead

Within three days Capitalized Agricultural Service and the Survey of the South Pole, expect to return to civilization from the North Pole in possession of the knowledge and power that will enable scientists to predict weather conditions for a year or more in advance.

One glance at the past—especially if she who passed is pretty.

Some men uphold a good thing, and some others attempt to hold it up.

### Wireless Phones Between Trains

Experiment Tried in France Promises Safety for Passengers

Wireless phone conversations between trains moving at the rate of forty miles an hour and the Paris central station have been successfully tested out a promise of greater safety for passengers, as well as a considerable elimination of intermediate signaling stations.

A train constructed

on top of

an ordinary coach

in constant

communication with other antennae

between two telegraph poles midway of the experimental area and enabled the use of telephone wires to be established between the receiving point.

The voice of a train conductor

could be heard clearly over a distance of fifty miles by the receiving station in Paris as the train moved each station or railroad side.

The Nord companies are extending the experiments as far as Calais.

Wireless signals are used in

Paris and Rouen with complete satisfaction.

Meanwhile the state lines are

considering the elimination of obse

latory telephones despatching.

The penguins of the Antarctic region are the most human of all the bird family, walking upright and living in communities, quite unafraid of man.

J. Hamilton has been doing some cartoonist work and has executed some very skillful caricatures of local celebrities.

Mrs. A. C. Macdonald will be "At Home" on Wednesday, February 22, from 3:30 to 5:30 p.m.

The "Men's Own" meeting on Sunday last drew a very large attendance; the debate was, "Resolved that all Railways should be Government owned?" The affirmative was conducted by Messrs. G. M. Johnston and D. Lush and the negative by Messrs. H. H. Hall and G. Vaughan. Those present gained considerable information on the subject as it affected our country. Messrs. S. T. Lewis, J. Humphries, D. MacEachern and Mr. Manchester also gave interesting small talks on the topic in the general discussion which followed.

Rev. V. M. Gilbert asked that no decision on the debate be given that due observance of Sunday, at the meeting, be not intringed on.

It was the pleasure of Ye Editor to attend the meeting of the High School Literary Society, last Friday afternoon and to spend a very enjoyable hour there. The meeting was opened and the Secretary read the minutes of the previous meeting, which were passed as read. The Union S.S. Orchestra then rendered a musical selection, which was followed by a recitation by Miss Winnie Bowles. The speaker for the afternoon was Rev. L. J. Tatham, who gave a very interesting and instructive address entitled "University Life in Oxford," which was much enjoyed by all. A vote of thanks and appreciation was accorded to Mr. Tatham. Following Mr. Tatham's address a paper was read by Miss Myrtle Fountain, on school and current events; a recitation, by Miss Mildred Arthur; piano duet by Misses Lillian Hayes and Kathleen Sexton. The meeting closed with another selection by the orchestra. Parents are invited to attend these meetings.

## Buffalo

Miss Ruth Edgington, left last week for Hilda, Alta., where she will teach the spring term of school.

Mrs. F. W. Hughes, entertained the Buffalo Institute,

The Whistle Blew and the Game was called

then the defeated team spent twenty minutes explaining how they lost. If such and such a thing had been done—if they had had another ten minutes—but the whistle blew.

If you fail to put forth your utmost effort now you may lose the game.

last Wednesday evening, February 8. It being the date of their regular monthly meeting. After luncheon the meeting was called to order with the Pres. Mrs. Edgington in the chair. Mrs. Edgington, acting as Secretary, presided. The members responded to roll call by giving the name of a member of the Federal Cabinet. Miss Dolly Smith gave a recitation. Mrs. W. E. Edgington, gave a reading. After the usual business the meeting adjourned and a social hour was spent.

The entertainment in the hall on Thursday night was quite a success despite the inclement weather it being one of the worst nights of the whole winter. Dancing was enjoyed until a late hour.

There is to be a whist drive and dance next Wednesday evening in the hall.

Buffaloites were entertained by the Bullen Bros., last Thursday night, the weather was cold and a blizzard was raging which prevented many from attending. The show opened with an exhibition of the Great Ornith Homo Saurus, a fearsome and wonderful creature. A graphic and very humorous description of the creature being given by Robert Bullen. A pleasing medley was given by Mr. and Mrs. R. Bullen, introducing a few old favorites; the item which was vociferously encored demonstrated that Mr. Bullen is the possessor of a very fine tenor voice. Percy Bullen kept the audience in roars of laughter with his comic antics and rendering of his character song. Quartette, duets, followed, then came a screaming monologue entitled "The Village Blacksmith." The manner in which this was given fairly brought down the house. The sketch "Fun in a Barber Shop" was well received. A character musical number was put on by the ladies and in response to hearty applause gave another humorous item. A sketch entitled, "A Poor Pupil" was the concluding item and was undoubtedly the "piece de resistance" of the whole evening. The whole programme was under the direction of Robt. Bullen, late principal tenor with Reynolds Minstrels, London, England, and the show is said to be booked for a tour through Canada.
